ABOUT ME

Hi, I'm Muhammad Haziq, a creative developer and BS Computer Science student with a strong interest in Artificial Intelligence, app development, and emerging technologies. I love turning ideas into modern, user-friendly digital products and exploring how AI can solve real-world problems. I'm always learning, always building, and open to freelance projects and collaborations. I'm also working toward a Master's in Computer Science to deepen my skills in AI and research.
